VerSus International Student Competition:

Lessons from Vernacular Heritage for Sustainable Architecture.

EVALUATION CRITERIA

Juries will use a grade assignment system. The maximum grade will be **100 points**.

Particular relevance will have the sustainability criteria of the project.

The Jury will evaluate it by using the **Project VerSus operative research approach** that participants must use in the design process.

Considering the sustainability concept in a holistic perspective, as much sustainable principles the project will consider at same time, the higher the grade will be.

Evaluation criteria:

- Consistency with the competition objectives (demonstrated inspiration from vernacular architecture): Max points **20**/100;
- Vernacular architecture analysis (related bibliography, description accuracy, consistency of examples): Max points **20**/100;
- Sustainability of the project (related to the **Project VerSus operative research approach**): Max points **40**/100;
- Proposal feasibility: Max points **10**/100;
- Clarity and quality of the delivery and presentation of ideas (graphic quality, text clarity, data richness, etc): Max points **10**/100.

In case of *ex-aequo*, prizes will be divided equally.

The Jury decision will be final and irrevocable.

This project has been funded with support from the European Commission
